

We are all on the same boat!!!

by Owen Mullen, April 2020

This is a boat we are on. Whether we like it or not, we all share the same concern or should. We all live on a planet and Universe; that knows no dividing lines, no colors-inclusive, or species that are not important. The planet, the people and organisms must synchronize and work together to bring harmony to us all. How do we do this?

Great mystery; money, power, material things, family, friends, health. What are the goals or aspirations for us all? Do we even have them or are they fed to us like candy? How do we recognize where and how we fit into the 'bigger picture' as it were.

So for this small segment of your life, let us look at what is currently going on.

Of course the jews ARE STILL AT ODDS WITH THE ARaBS. GREAT. How does that affect you personally? What is happening in Iraq, Iran, Syria, Afghanistan, Africa and Korea????????? Why don't these folks know that they have been stirred up by the forces who want to make money off the war they are encouraging? Maybe the internet is not reaching them. I don't know, but I do know that we are collectively real ready to wake out of our sleep and not let people in power or with the wealth control our boat, the planet Earth.

Let's look at the boat idea: There are different levels on the boat; upper, lower, down under and real up above. We are, as fellow americans, for the most part definitely on the upper levels in our comfortable compartment. WE ARE OUT AT SEA in the UNIVERSE area. Floating as a planet, we are learning that the planet is not flat and that space issues are real. GREAT, let's wake up and know that we are small but maybe significant players in a grand play of things. To put it simply, We ARE all on this 'boat' together. Not much you can do about it (unless you are Elon Musk or own your own space-ship). The boat is a great analogy; people occupying the upper most levels, to the folks down below doing all the dirty work! The captain and his crew trying to see us thru all the straights of life , doing the best to avoid the icebergs (and plastic waste!) and the crew members who care the most of any of us. Take stock of your true place on the boat and see what we are up against.
