

## What is Going on?????

In today's world of uncertainty, almost everyone is asking this question and that is very good. Want to return to normalcy? What is that and why do we want to return to something that was not working? I heard someone say "Let's make America great again"..... When were we great? When we stole the land from the Native Americans? When we enslaved the Africans? When we would not let women vote? When we would not let black people into restaurants or bathrooms?

Yes, we are evolving as a country that is home of the free and land of the brave. We are growing, learning and most of all awakening; thanks mostly because of Natural disasters, like the Corona deal. How about earthquakes, tornadoes, volcanoes, hurricanes, droughts, floods, pestilences and now viruses! Yes one could say there is a problem (with 1% of it's people having over 90% of the fund available). Do you think that it is good to believe that we as humans on the planet are in control or is there something 'out there' that is an almighty power that is really calling the shots here? I know from a farming point of view you can not plant a potato seed and expect a corn plant to grow. So why don't we look at the seeds we are planting everyday and what we sow is what we are going to harvest. Greed, power, racism, materialism, fascism are these the seeds that grow peace, harmony and joy?

Well it is time to explore an antidote to what is going on. All I can say is that we can not expect different types of people to get along on the Earth if Man and Woman can't. How about the divorce rates and how easy it is to get out of a marriage? Well, it comes down to this; priorities. Do we keep our commitments? The answer is a simple no, we don't. We have been programmed to justify not keeping them. It OK to lie, cheat, steal and hurt others in the process of climbing the status ladder. We all have an ego and I believe that was given to us for self preservation, not to amass crazy amounts of money or material objects. It is really not a game as some consider it. It is an experiment on the GRANDEST level to see how far the human being can evolve both Spiritually and physically. Yes we have come a long way but still have very far to go.

One big thing we can do is keep our commitments to each other. Do not promise what you can not do. I'm not just talking to the politicians, but to you and me.

Thanks for spending the time to read this!
